About "Inside The Clarion University Libraries"

The Clarion University Libraries newsletter is published weekly when classes are in session. Through *Inside*, we share information about our services and resources with the campus community.

Inside is best viewed with Microsoft Outlook.

However, you can read a PDF version of *Inside* online.

Access it through the Libraries' homepage at: www.clarion.edu/library

Early American Titles - Enhanced Accessibility

Carlson Library recently added author-title records into *PILOT*, the library's online catalog of holdings, for more than 16,000 early American books and documents. These additions represent the individual holdings of the Early American Imprints, first series, 1639-1800, microfiche collection and is listed in Charles Evans' work, *American Bibliography*.

The microfiche contains the full-text of all known and existing books, pamphlets, and broadsides published in America from 1639-1800. Both the bibliography and the microfiche can be found on Level 1 of the Library and individual titles from the collection can now be searched in *PILOT*. Examples of the available titles can be found by doing a call number search in *PILOT* using "Early American Imprints" as the search string.

Images Of America In The Early French Rock Press

Dr. Elisabeth Donato, associate professor of modern languages, will be the opening speaker in the Spring Faculty Author Seminar Series. Join us this Friday, January 30th, at 12:15 p.m. on Level A of the Carlson Library. A light lunch will be served beginning at noon.

Donato's presentation titled "Je t'aime...Moi non plus: Images of America in the Early French Rock Press," will discuss the conditions under which "serious" rock and roll criticism emerged in France. She will also be examining how the discourse of early French rock criticism, reflects a fascination with, and attraction to, America in an era when France was paradoxically expressing some staunch anti-American sentiments.

The series is sponsored by the Faculty Affairs Committee of Faculty Senate in cooperation with the University Library and funded through the Clarion University-Wide Faculty Development Committee's Presidential Advancement Award.

Computer Labs - Clean & Healthy

It's cold and flu season and the University is trying to help keep you healthy! Disinfecting wipes are available in each of the Computer Labs in the Libraries. Take the time to use them to wipe your hands and the keyboard before you begin using a computer. This simple and quick precaution may help to keep everyone healthier.

Computer Tip: Cool Spin Tricks

Did you know that if you have a mouse with a scroll wheel on it, you can do some really cool tricks?

Shift and Spin -- When viewing web pages, hold down the **Shift** key and spin the wheel on your mouse. Internet Explorer goes either backward or

forward through the pages you've recently visited, depending on which direction you spin. I'll wait while you give that a try. Open up IE and follow a few links. Then, hold down your Shift key and start spinnin' that wheel.

Ctrl and Spin -- If you are in a Web browser or reading an e-mail in Outlook Express, hold down your **Ctrl** key and spin your mouse wheel. It makes the text larger or smaller depending on which way you spin.

Not only does this spinning technique save lots of time, but it has the added bonus of impressing the heck out of any novice computer users in the area. What more could you want?

Something to Think About:

What we call 'Progress'
is the exchange
of one nuisance
for another nuisance.
